Subject: D3481-043 Bracket and Clamp for Shroud Airflow Heater

It has come to my attention that the QS20056S clamp that we use in the heater kit is to large for its purpose. The clamp runs out of thread before it is able to tighten around the D3469-043 piece. I found a clamp in stores that will take care of this problem – QS200M44S.

Dale/Jason - please raise an NCR or PAR - SOURCE - Garth

Marc - please update the drawing and paperwork

Linda – please halt any production of these until we can have this clamp changed.

Bill – perhaps we should send Garth an updated clamp assembly.
